EDUCATION

- **Stony Brook University** Stony Brook, U.S.A.
Masters in Computer Science *Expected 2026*
- **Vishwakarma Institute of Technology** Pune, India
B.Tech in Computer Engineering: CGPA: 9.1/10 *2020 - 2024*

WORK EXPERIENCE

- **JPMorgan Chase & Co.** Mumbai, India
Software Engineering Intern *Jan 2024 - Jun 2024*
Collaborated in a team to store financial data using ETL jobs in a AWS Data Lake and efficiently correct user errors by developing a correction platform using Spring Boot. Identified and resolved security vulnerabilities in the code base and increased test coverage to above 90%.
- **JPMorgan Chase & Co.** Bengaluru, India
Summer Intern *Jun 2023 - Jul 2023*
Created a natural language model for data compliance, preventing insider trading and information leaks which was chosen as a prototype at JPMorgan.

EXTRA-CURRICULAR

- **Team Quark** Pune, India
Co-Founder and Club Head *Sept 2022 - May 2023*
Founded a technical club focused and innovating new opportunities for students by promoting trending technologies in my undergrad college.
Coordinated workshops and hackathons, facilitating a collaborative environment for learning.
Led a team of 10 students which grew to 100+ in the first year.
- **The Robotics Forum** Pune, India
Machine Learning Engineer *Oct 2021 - Sept 2022*
Built multiple projects in the fields of Machine Learning and Image Processing gaining hands-on experience.
Participated and won hackathons working in a team.

PROJECTS

- **Idea Management Platform (Python, Django, Tailwind CSS, AWS) [Link](#)**: Developed an end-to-end idea management platform that tracks an idea right from ideation to implementation. Also incorporated role based access for ideators and idea approvers. (Jan '23)
- **Carbon Score Predictor (Python, Django, Tailwind CSS, Machine Learning) [Link](#)**: Built AI-powered web application that takes in an user's daily habits (electricity consumption, vehicles, plants in surroundings) and calculates his/her net carbon score. (Jan '23)
- **Pneumonia Detector (Deep Learning, Convolutional Neural Networks, Django) [Link](#)**: Engineered a neural network that takes in a x-ray image and detects if the person is suffering from pneumonia. (Jun '22)

TECHNICAL SKILLS

- **Languages**: Python, C++, Java, SQL
- **Tools**: AWS, Terraform, Tensorflow, Keras, Scikit-learn, Django, Spring Boot, Node.js
- **Domains**: Cloud Computing & Infrastructure, Data Engineering, Artificial Intelligence, Machine Learning, Backend Development

ACHIEVEMENTS

- Secured **1st position** in the **Bridgestone Webathon** hosted at **COEP Mindspark'22** (Prize money of \$1200). [Link](#)
- **2nd Runner up** in the **Cummins Innovation'23 Hackathon** conducted by **UBS**. [Link](#)
- Secured **2nd position** in the **Code for Good'22 Hackathon** organised by **JPMorgan Chase Co.** [Link](#)
- **Nvidia Certification - Fundamentals of Deep Learning** [Link](#)
- **Nvidia Certification - Natural Language Processing Applications** [Link](#)
